PROJECTS

sked.us Sked

Platform for organizations to set & book appointments
Main responsibility was building UI/UX functionality
Designed front-end to show only info relevant to user based
on role in organization and status of appointment
Group Project - AngularJS - Bootstrap - Node.js - LinkedIn Auth - MongoDB

homepage-ish.herokuapp.com Homepage-ish

Effectively combined data to layout a homepage for user
to get a glimpse of several different things
Utilized Twitter authentication to show user's feed, allow them
to send a Tweet, & Reply, Retweet or Favorite a Tweet
Used the New York Times API and Dark Sky Forecast API
for news/sports & weather data
Full Stack - AngularJS - Node.js - Bootstrap - PassportJS - MongoDB

weather-ish-kpfein89.c9users.io Weather-ish

Implemented Geolocation to display local
weather data on webpage load
Utilized Google Places Library and Autocomplete API for
easy user input of search location
AngularJS - Bootstrap
